

## Motorized Skylight

### FEATURES OF SKYLIGHT SYSTEM

The system designed for shopping center, shops, stores, café, fast foods areas, restaurants, patisseries, hotel and so forth other special areas which requires obtaining more living space area for the users. The system retractable glazing ceiling moves back and front by engine as lift ratios. One of vane is fixed other three vane are moving. System can stop moving vanes at any level.

You can open it half or full. The vanes are optionally fixed to the higher side. With our patented joining system you can restm assured it'll be 100% waterproof. Through the modern and graceful appearance looks beautiful everywhere. There is an engine top of the system in aluminum profiles frame . Without disassembling the system engine can be disassembled and installed.

## Fixed Skylight System

### FEATURES OF FIXED SKYLIGHT SYSTEM

Skylights brighten living spaces, creating a more comfortable and productive environment. Any room can benefit from increased natural light, including kitchens, living rooms, bedrooms, bathrooms, studies, and enclosed porches. Skylights can be paired with windows or operable walls to create a relaxing sunroom environment.

Natural daylight creates a more productive work environment, making skylights a popular choice for businesses of all kinds. Customers are also more attracted to brighter, naturally-lit environments. Restaurants and retail stores with skylights create a relaxing and enjoyable customer experience. Skylights are also commonly found in institutional settings like retirement homes, hospitals, and religious buildings as a source of natural light.
